

SELF SERVICE TERMINAL**Abstract**

A self-service terminal (14 or 114 or 214) and a system (10, 100, 200) including a plurality of networked self-service terminals are described. Each terminal (14,114,214) has a simple user interface. In one type of terminal (114 or 214), the user interface consists of a dispense area. In another type of terminal (14), the user interface consists of a dispense area (40) and a communication port (38). In one of the systems (10) a user is able to execute a transaction using a portable communication device (24 or 26) implementing a local wireless technology. In the other systems (100 or 200) a user is able to execute a transaction using a cellular network.
